Hack Reactor

2016 - 2017

- Advanced Software Engineering Immersive Program.

Daelim University College

2000 - 2006

- B.S Mechanical Engineering.

Software Engineering Projects

The Gauntlet | <https://the-gauntlet2.herokuapp.com>

Social media based web application that allows users to create custom competitions and vote on winners.

- Integrated **React** with **Redux** to centralize the state and improve the performance of the Data Flow
- Built **Amazon S3** AWS server to store large amounts of data securely and allow instantaneous access
- Utilized **HTML, CSS, and Bootstrap** within a React framework to create a responsive user interface
- Built user authentication with **MySQL session** and **Bcrypt** to keep users information more persistent and secure

WeFit.ly |

Web application allowing users to find personal trainers based off of their location

- Created **MongoDB** schemas to store profile information for multiple categories of users
- Constructed application data flow by using **React** along with a **Node/Express** server
- Managed code reviews, **Git** merges, and design meetings in a team of four

My Kicks |

A personal website displaying my shoe collection as well as corresponding reviews.

- Designed responsive website using **Angular, Express, Node, MySQL** within a 48 hour deadline
- Implemented **MySQL** to create **relational database** for user commenting system

Experience

Prism Logistics

2016

CSR /Logistics Coordinator

- Created shipment documentation including commercial invoices, BOL's, SLI's and SED's filings
- Ensured financial paperwork was processed / maintained, verifying payment amounts and billing
- Received goods in warehouse, entered PO in ERP system, shipped goods outbound

Yanagi Sushi and Grill

2007 - 2015

Supervisor / Chef

- Doubled monthly average sales from \$16,000 to \$32,000 by creating innovative menus and introducing novel cooking styles
- Managed 5 chefs' schedules, inventory, and orders of produce and deliveries
- Repaired / upgraded computer hardware including motherboards, CPU, RAM, and HDD

Personal

My very first programming experience was editing and making RPG games by using **Qbasic** on my old buddy 386DX, I had no idea what I was doing but ever since, my curious nature has led me to explore programing. I am also very outgoing person who love **outdoor group activities** like play basketball or anything!
