- B.S Mechanical Engineering.

Software Engineering Projects

The Gauntlet | <https://the-gauntlet2.herokuapp.com>

Social media based web application that allows users to create custom competitions and vote on winners.

- Integrated **React** with **Redux** to centralize the state and improve the performance of the Data Flow
- Built **AWS S3** server to store large amounts of data securely and allow instantaneous access
- Utilized **HTML, CSS, and Bootstrap** within a React framework to create a responsive user interface
- Built user authentication with **MySQL session** and **Bcrypt** to keep users information persistent and secure

Homepage | taegyuleem.herokuapp.com

My personal website displaying my work collections and lifestyle.

- Utilized **Angular-xgallerify** to create completely responsive gallery on any device
- Implemented **Angular resolve promises** to delay rendering images until **XHR** request have completed
- Created a weather widget by using **Yahoo weather API** with live updating algorithm
- Built a connection to **AWS S3** server to store personal data secure

WeFit.ly |

Web application allowing users to find personal trainers based off of their location

- Created **MongoDB** schemas to store profile information for multiple categories of users
- Constructed application data flow by using **React** along with a **Node/Express** server
- Managed code reviews, **Git** merges, and design meetings in a team of four

Experience

Prism Logistics

2016

CSR /Logistics Coordinator

- Created shipment documentation including commercial invoices, BOL's, SLI's and SED's filings
- Ensured financial paperwork was processed / maintained, verifying payment amounts and billing
- Received goods in warehouse, entered PO in ERP system, shipped goods outbound

Yanagi Sushi and Grill

2007 - 2015

Supervisor / Chef

- Doubled monthly average sales from \$16,000 to \$32,000 by creating innovative menus and introducing novel cooking styles
- Managed 5 chefs' schedules, inventory, and orders of produce and deliveries
- Repaired / upgraded computer hardware including motherboards, CPU, RAM, and HDD

Personal

I have been interested in computers since childhood. Tried to figure out how to integrate hardware and software, edit and make RPG games by using **Qbasic** on my 386DX. Ever since, my curious nature has led me to explore programming. I am also very outgoing person who love **outdoor group activities** like play basketball or anything.
